

# Hot Water Filter Cartridges

## SWH Series

Rainfresh SWH series filter cartridges are string-wound depth filters with a stainless steel core, designed for efficient removal of particulate matter and fine sediment from hot water. These cartridges provide an efficient, cost effective filtration solution for applications like process water, HVAC systems, etc

The SWH cartridges are constructed from virgin polypropylene micro-fibre media. The string-wound construction results in larger void volume that provides excellent flow characteristics with low pressure-drop and high efficiencies.

### BENEFITS

- Higher Efficiency
- Higher flow rates
- Better dirt-holding capacity
- 100% food-grade polypropylene media
- Cost-Effective

\* - @ 30 psi feed pressure

### SPECIFICATIONS

Cartridge Type	Length (Inch)	O.D (Inch)	I.D (Inch)	Micron Rating	Max. Operating Temp
Double Open End	9.75 (247 mm)	2.65" (67 mm)	1.10" (28 mm)	1µ nominal	175°F

All dimensions are nominal

### MODEL NUMBERS

- SWH1-5 : 1 micron nominal
- SWH5-5 : 5 micron nominal
- SWH10-5 : 10 micron nominal
- SWH15-5 : 15 micron nominal
- SWH25-5 : 25 micron nominal
- SWH30-5 : 30 micron nominal

### HOT WATER FILTER HOUSINGS

Rainfresh all stainless steel (304) filter housings are designed for use with hot water.

**ESS1** : Accommodates one 10" cartridge

**ESS2** : Accommodates one 20" cartridge

For details on larger stainless steel filter housings, please visit [www.rainfresh.ca](http://www.rainfresh.ca) and click on Commercial products
